SCISSORS

ASSEMBLE!

HERE'S HOW: Trim out the 3 pieces that form your papercraft as indicated. Don't forget to cut the assembly slots in each piece.

*No tape? No glue?
No knives?*

No kidding!

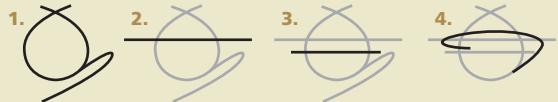

Foreground piece

YOU'RE ALMOST DONE!

Roll the base piece into a loop-type shape and secure by sliding the two vertical BLACK slots into each other. Then insert the background and foreground pieces into the base by aligning the corresponding BLUE and GREEN slots. Then carefully wrap and tuck the airplane part of the base loop around the back of the papercraft as shown in the photo above.

VISIT GEEKDAD.COM • Geeks are passionate about the things they love. From games to robots, science to crafting, we dig deep into our pursuits with equal parts fun and obsession. And we approach parenting the same way. We want our kids to look at life both critically, and with a sense of whimsy. We are the first generation of geeks who are proud to carry the title, and we are raising our kids to be Geek Generation 2.0.

This base loop piece is not hard to cut out but it takes some patience and control. As with all great scissor-cutting, rotate the PAPER while cutting (not the scissors) and you'll get pro-looking edges thus granting you LOTS of geek-cred when people see the finished papercraft! So take your time and have fun!
